[www.wrightway.com.au](http://www.wrightway.com.au)

### **SAFE, SIMPLE MANUAL OR ELECTRIC RELOCATION OF SINGLE OR MULTIPLE 120 LITRE TO 240 LITRE WHEELIE BINS**

Basic purpose-designed trolley with either one or two Handling Brackets.

Five models available:

- three manual models
- two electric models.

All manual trolley models have a failsafe mechanical braking system which, as well as assisting in loading the bins, also prevents the loaded trolley getting out of control. The Electric models have a magnetic brake that automatically applies when the throttle lever is released.

Innovative Handling Bracket enables more than one bin to be handled at a time. The addition of two handling brackets enables up to four empty or lightly laden bins to be moved at once.

### 5 MODELS TO SUIT A DIVERSE RANGE OF SITUATIONS AND BUDGETS

#### Essential Trolley

Basic model: Able to handle one (or two bins piggyback). Failsafe braking, large puncture-proof tyres, a wide track aiding stability, and a kick stand for vertical storage (see image below right).

#### Multi

With the addition of a Cargo Bar and a Handling Bracket this model can carry two bins abreast or piggybacked and can handle up to three or four bins at a time.

#### Dolly Trolley

Builds on the Essential with the addition of a third wheel which takes the load of the tilted bin off your back. It is designed to move single heavy bins reducing the risk of WH&S injury to the operator.

#### Electric (see image Right)

Powered by twin 24v electric motors & featuring a tilt-load bearing third wheel, the Domestic Electric takes the whole load, the whole time. Like the manual Multi, it can handle two bins abreast or piggy-back or three bins in a triangular formation.

#### Heavy Duty Electric

Designed for prolonged operation in non-residential environments. Featuring two battery sets it can operate for two and a half hours without re-charging. The second handling bracket makes it possible to handle four empty or lightly laden bins at a time.

	Essential Trolley	Multi	Dolly Trolley	Electric	HD Electric
Failsafe Braking	Y	Y	Y	Y	Y
Puncture-proof tyres	Y	Y	Y	N	N
One bin from any side	Y	Y	Y	Y	Y
Two bins piggy-backed	Y	Y	N	Y	Y
Two bins abreast	N	Y	N	Y	Y
Three bins	N	Y	N	Y	Y
Four bins	N	Y	N	N	Y
Dolly wheel	N	N	Y	Y	Y
Powered	N	N	N	Y	Y
