

ACCESSORIES: AS VARIED AS YOUR NEEDS

Chassis

Apertures

Handles

Locks

and much more

Every customer has individual requirements

1. Chassis

■ BRAKES

■ Foot brake (standard version)

- Foot pedals on the front wheels prevent rotating and swivelling

■ Central brake

- A foot pedal on the right side of the container prevents the two front wheels rotating and swivelling; the brake engages automatically and is disengaged with a triangular key

foot brake

central brake

■ DIRECTIONAL LOCK

- Prevents both left hand wheels from swivelling, which enables easy manoeuvring

directional lock

■ WHEELS

■ Castors with steel rim

- Strong durable rim for heavy loads

■ Castors with steel rim and ball bearing

- Suitable for the heaviest loads and for travel over long distances; standard for use with towing brackets

■ Non-marking castors

- For indoor use; tyres do not mark floor covering

■ Castors with Polyamide (nylon) wheels

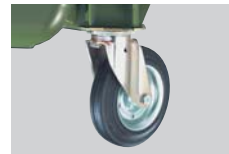

- For special hygiene requirements, e.g. use in the food industry

■ Castors with elastic-solid rubber tyres and ball bearing

- Durable tyre with minimal rolling resistance; recommended for use with heavy loads and towing brackets

■ Castors with steel rim, roller-bearing and RD-tyres

- Durable tyre with minimal rolling resistance; recommended for use with heavy loads and towing brackets

RD-tyres

■ TOWING BRACKETS

- Up to 5 containers can be linked
- Can be retro-fitted

towing brackets

towing brackets

■ FORK LIFT DEVICE

- For easy transportation by fork-lift truck

fork-lift device

fork-lift device

2. Lid apertures

■ RECYCLING APERTURES-ROUND

■ 150 mm diameter with rubber rosette and cover ring

- Two apertures per container
- Ring neatly covers the rosette fastenings
- Suitable for standard bottles

■ 200 mm diameter with rubber rosette

- Two apertures per container
- Suitable for large bottles

■ 200 or 300 mm diameter without rubber rosette

- A low cost solution (not shown)

150 mm Ø

150 mm Ø

200 mm with rubber rosette

■ PAPER APERTURES

■ Front opening (1100 litre flat lidded container)

- Two small slots, ideal for the collection of confidential documents (in combination with lid lock)

■ Paper hood

- Recommended for outdoor use
- Various eye catching colour options

front opening

paper hood on top

■ RECYCLING APERTURES-RECTANGULAR

■ Rectangular opening with brushes and cover ring

- Suitable for the collection of recyclable material such as plastics, cans or glass
- Ring neatly covers the brush fastenings

recycling aperture

recycling aperture

■ LID WITHIN A LID

- Available for the 660 litre container and all dome lidded containers
- The lightweight additional lid allows for effortless filling of the container
- Prevents depositing of bulky waste
- Various eye-catching colour options
- The 1100 litre container can be filled from both sides, with the addition of a further lid at the rear

3. Lid opening device

- Effortless opening of the lid with a foot pedal
- Prevents manual handling of lid
- Stable design, corrosion resistant metal
- Can be retro-fitted

lid opening device

lid opening device

4. Easy-grip rear handles

- Available for all dome lidded containers (1100 litre with child safety device, 1100 litre lid within a lid, 1100 litre automatic lock)
- Easy manoeuvring of the container, even with heavy loads and/or with protective gloves

easy-grip handles

easy-grip handles

5. Noise reduction -flat lidded

■ LID CLOSING

- Reduces the noise of the lid when closing

■ LID OPENING

- Prevents lid banging against body when fully opened

lid closing

lid opening

6. Lid locks

■ TRIANGULAR LID LOCK

- Operated with triangular key in accordance with DIN standard for extra security
- On domed lidded containers the lock is integrated into the lifting trunnion
- Snap-lock or lock/unlock function on flat lidded containers

triangular lid lock

triangular lid lock

■ AUTOMATIC LOCK

- The container unlocks automatically when emptied and locks again when lowered. The collector does not require a key and there is no slowing of the disposal process.
- Standard with 1100 litre automatic lock

■ Version 2300/2303

- With cylinder lock

■ Version 2303

- In addition to the built-in cylinder lock, a standard half cylinder can be installed which can be opened with a master key
- The automatic locks are available with either individual or universal keys

■ PADLOCK DEVICE

- Standard with all dome lidded containers
- For all common types of padlock

padlock device

padlock device

7. Markings*

■ LID IMPRINT

- A permanent imprint is stamped into the container

■ HOT-FOIL IMPRINT

- A durable, single colour hot-foil imprint for individual marking on the container body

■ MOULD ON GRAPHICS

- Individual, single colour marking on body and/or lid

■ ADHESIVE LABEL

- Individual markings with exchangeable multicoloured adhesive labels
